MAPLEWORKS TECHNOLOGY ANNOUNCES OPENING OF SAN JOSE OFFICE

MapleWorks Technology, a leader in software development outsourcing solutions and services for the network communications, announces that it has opened offices in San Jose, California. The Ottawa based company specializes in software development outsourcing solutions in element management, broadband infrastructure, video application development, mobile application development, cloud computing/Saas, and unified communications.

Despite rough economic times, companies continue to value and invest in technology in an effort to differentiate themselves, but many struggle with the cost. MapleWorks shows businesses how to transform themselves with a cost effective business model that inspires innovation and can show a faster return on their investment. The company provides expertise to help customers develop their products from scratch or make the switch to newer technologies, such as cloud computing so they can quickly improve productivity and show a faster return on their investment.

“We are excited to continue to expand our presence further into the West Coast, which is considered a hot bed for technology investment.” Paul Gasparro, CEO of MapleWorks Technology.

About MapleWorks

MapleWorks Technology is a proven provider of software development services to network communications product suppliers, serving the carrier and enterprise markets.
