MAPLEWORKS ENTERS PARTNERSHIP WITH AUTOMATEDQA

MapleWorks Technology, a leader in software development outsourcing solutions and services for the network communications, today announced a partnership with AutomatedQA, makers of the TestComplete automated testing software.

MapleWorks will offer automated test creation services to AutomatedQA customers to help them quickly make a test environment productive. MapleWorks has years of expertise in test automation, specifically with AutomatedQA's TestComplete, an automated testing tool with unmatched support for functional, regression, distributed and web performance testing.

According to MapleWorks Vice President and Co-founder Paul Gasparro, "As a proven provider of software development services to network communications product suppliers, serving the carrier and enterprise markets, MapleWorks is a perfect partner for AutomatedQA."

AutomatedQA's Director of Strategic Alliances, Kevin Pardue said, "AutomatedQA's low cost TestComplete software automates the full range of Windows and web testing making it faster and easier to ship quality software. MapleWorks QA expertise and test creation services are a great resource for ramping up current testing efforts or kicking off a new automated testing initiative. We're confident that MapleWorks will help meet our customer's growing demand for even more test automation."

About MapleWorks

MapleWorks Technology is a proven provider of software development services to network communications product suppliers, serving the carrier and enterprise markets. The Company delivers trustworthy onshore engineering and design services with a deep-domain experienced team that is knowledgeable in commercializing technology in a cost-effective manner. MapleWorks is headquartered in the Ottawa Region known as Canada's Silicon Valley, providing solid IP protection for their customers. For more information visit www.mapleworks.com.

About AutomatedQA

AutomatedQA has been making award-winning software products for quality assurance and software development projects worldwide since 1999. AutomatedQA's flagship product is TestComplete, the automated software testing solution that's easy to use and affordable for any size team. TestComplete

automates and accelerates software tests for all Windows software, including Web, .NET, Java, Windows Desktop, Flash/Flex, Ajax and Silverlight. TestComplete's unified interface enables testers to learn one product and automate the full range of test types including functional testing, load testing, distributed client/server testing and unit testing.

A free trial download of TestComplete is available now: <http://www.testcomplete.com>
